WE OFFER CUSTOMIZED SERVICES

We develop, realize and optimize procedures, products and facilities until they are ready to be put into service and on the market. We analyze your needs, show possible solutions and together develop an individual concept for realization. Find out how Fraunhofer developments revolutionize modern medicine. From patient-friendly mini sensors to standardized networks to user-adapted platforms: Developments of Fraunhofer Institutes put the people and their needs and wishes in the focus.

FRAUNHOFER-GESELLSCHAFT

At present, the Fraunhofer-Gesellschaft maintains more than 80 research units in Germany, including 60 Fraunhofer Institutes. The majority of the 18,000 staff are qualified scientists and engineers, who work with an annual research budget of €1.66 billion. Of this sum, more than €1.4 billion is generated through contract research. Two thirds of the Fraunhofer-Gesellschaft's contract research revenue is derived from contracts with industry and from publicly financed research projects.
